Deliverect <> POS
Online orders. Simplified

Save time, reduce costs and enjoy reliability

Easily manage your online orders from your POS, so you can focus on what matters most: your customers. Centralize your delivery services, update your menus and gain insights from one single screen.

Sound familiar?

| Too many different tablets | Re-punching online orders manually | Missed or incorrect orders | Too many menus for different locations |

How Deliverect works

Simple set-up

Deliverect aggregates all your existing online and third party sales channels to your Deliverect account.

Order management

Deliverect pushes all your online orders to NCC to avoid manual your POS and provide you with a complete overview in one screen.

Improved flow

Orders are automatically pushed straight to the kitchen and printed in one standardized format.

Quick delivery

Follow orders through their delivery journey. Send and receive real-time updates and share drivers details.

Benefits

Save time

With just **a few clicks** on the Deliverect platform, you can edit and publish your menus, track your stock and snooze products across multiple platforms and locations.

Reduce costs

Reduce staff admin by eliminating manual entry and minimize food waste due to accurate stock and data so you can increase **productivity and profitability.**

Enjoy reliability

Our solution is **always on & accessible from any device**. We process **1M+ orders a week** and continuously update & add features, at **no additional cost or effort** by our customers.

Why Deliverect?

Deliverect simplifies online order management by seamlessly integrating online orders from food delivery channels (Uber Eats, DoorDash, GrubHub,, etc.) to your POS, allowing 20,000+ establishments to improve operational service and increase customer satisfaction.

Don't just take our word for it

"It probably saves us 45 minutes per restaurant, per day."
- Andrew Lawrence, IT Manager, Chipotle
